

Legend

- insert
full background

/// page borders

/// margins

/// padding

/// content

/// shadows

- width 100%
- height 100vh

- is padding necessary
for box shadows? → shadows
apply to
padding

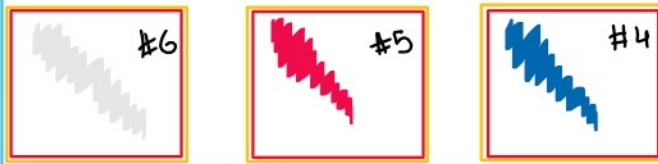

display: flex;
align-items: center;
justify-content: space-between;

flex {
 profile pic 50% width
 profile 50% width
}

flex-wrap: wrap;
↓
wraps down
(useful for mobile);

gap(50% - space)

- still deciding on
a standard padding

a standard padding format

→ each box element has their own margins

align 1 elem center
parent {
display: flex;
width: 100%;
height: 100vh;
align-items: center;
}

→ 1 child {

}

.
